

Takoma Park City Council Meeting – March 6, 2019 Agenda Item 4

Work Session

Proposed resolution declaring Climate Emergency and setting direction for the City's accelerated Sustainable Energy Action Plan.

Recommended Council Action

Discuss proposed resolution.

Context with Key Issues

At the January 23, 2019 Green Team meeting, members expressed growing concerns over the emergent nature of climate change. The Green Team discussed the possibility of the Takoma Park City Council declaring a Climate Emergency via a resolution. The Committee on the Environment followed up with City Council on February 5, 2019 to recommend that the Council take action and adopt a resolution declaring a Climate Emergency. This resolution also sets direction for an accelerated update of the City's Sustainable Energy Action Plan.

Cities that have declared a Climate Emergency recognize that the current rate of climate change of just one degree Celsius has triggered cataclysmic changes to the Earth. These changes include an accelerating collapse of the West Antarctic Ice Sheet, the thawing of the Arctic permafrost, an increase in mega-droughts, heat waves, super-storms, flash flooding, the migration of mosquitoborne diseases, the melting of glaciers, polar ice-sheet collapse, coral bleaching, the mass extinction of species, ocean oxygen loss, and sea level rise. In 2018 Takoma Park and the entire Washington DC region experienced the wettest year on record, with record flooding and stormwater issues. Trends for the region indicate more severe weather events, continued increases in annual rainfall, and more frequent and longer stretches of extreme heat. These changes inflict substantial and often catastrophic damage to our physical, social, and economic well-being.

Climate Emergency resolutions also recognize that scientists agree greenhouse gas emissions must be eliminated in a decade at most -- with a simultaneous global effort to remove excess carbon from the atmosphere -- to stabilize at or near the 1.5 C (2.4 F) threshold. This threshold will provide the best chance for survival of human civilization.

Declaring a Climate Emergency mobilizes action at the local level. A declaration builds public awareness that we are in an emergency with devastating consequences for inaction. The declaration will serve as a public statement that that our City will pursue necessary local steps to address this global challenge. By declaring that we are in a climate emergency and committing to addressing it in time to avoid the worst outcomes, Takoma Park can serve as a leader and inspire others to do the same. On December 5, 2017 Montgomery County passed Resolution 18-974 declaring a climate emergency. Cities that have adopted a Climate Emergency Resolution include:

Hoboken, NJ Berkeley, CA Richmond, CA Oakland, CA Santa Cruz, CA Los Angeles, CA London, UK

Council Priority

Environmentally Sustainable Community

Environmental Considerations

Greenhouse gas emissions, sustainability, energy efficiency

Fiscal Considerations

Economic resiliency; short and long term budget impacts of more frequent and severe weather events; increased health costs due to climate change; lost economic productivity and tax revenue

Racial Equity Considerations

Communities most vulnerable to climate impacts tend to be the least prepared to manage and recover from the physical, economic, mental, and social devastation climate change can cause. Children, the elderly, indigenous peoples, and those with preexisting health conditions are especially vulnerable to climate disruptions such as flooding, dangerous heat, drought, and poor air quality. This is particularly true if they live in low-income communities, which often are exposed to multiple environmental hazards, yet are least likely to have resources or connections to address the cumulative impacts of environmental exposures that are worsened by climate change. Montgomery County Climate Emergency Resolution

1	Introduced by	<i>r</i> :
2		
3		CITY OF TAKOMA PARK, MARYLAND
4		
5 6		ORDINANCE 2019- DECLARING A CLIMATE CHANGE EMERGENCY
7		
8	WHEREAS,	recent reports from the International Panel on Climate Change (IPCC) and the
9		National Climate Assessment have made clear that we are in a global climate
10		emergency, by documenting the extent, speed and acceleration of global climate
11		change and planetary warming, and their dramatic effects on our Earth; and
12		
13	WHEREAS,	climate change is already inflicting and will continue to inflict substantial
14		damages to our physical, social and economic well-being; and
15		
16	WHEREAS,	these damages, such as an increase in stormwater runoff and extreme weather,
17 10		will continue to worsen without immediate significant action; and
18 19	WHEREAS,	communities most vulnerable to climate impacts tend to be the least prepared to
20	WHEREAS,	manage and recover; and
21		
22	WHEREAS,	a greenhouse gas emissions inventory has identified residential and commercial
23		buildings as the largest contributing sources in Takoma Park; and
24		
25	WHEREAS,	Takoma Park strives to be a leader in responding to the challenges of climate
26		change and in reducing greenhouse gas emissions through our many local policies
27		and actions; and
28		
29	WHEREAS,	the City is publicly committed to action on climate change through the Global
30		Covenant of Mayors for Climate and Energy, the Paris Climate Agreement and the
31 32		Sierra Club 100% renewable energy pledge; and
32 33	WHEREAS	the City in Resolution 2018-9 (January 30, 2018) recently affirmed its
34	WILKLAS,	commitment to aggressively implement its current Sustainable Energy Action
35		Plan and related actions for all sectors of the City as its resources allow, and
36		acknowledged and supported Montgomery County's aspirational goals of 80%
37		reduction in greenhouse gas emissions by 2027 and 100% reduction by 2035; and
38		
39	WHEREAS,	as the City is committed to working toward racial equity in all its actions, and the
40		Council has established priorities including housing affordability, it is vital that
41		City climate related actions thoroughly integrate these commitments.
42		
43		E BE IT RESOLVED THAT the City of Takoma Park joins with communities
44 45		and the world to declare that we are in a climate related emergency that threatens
45 46		ty and others in our nation and worldwide, and which requires mobilizing more tion on all our parts; and
40	aggicssive ac	tion on an our parts, and

47			
48	BE IT FURTHER RESOLVED THAT the City of Takoma Park calls on, and will continue to		
49	advocate for, more aggressive action on climate change, mitigation and adaptation at the county,		
50	state and federal levels, to move rapidly toward net zero GHG emissions; and		
51			
52	BE IT FURTHER RESOLVED THAT the City of Takoma Park Sustainability Manager will		
53	accelerate an update of its Sustainable Energy Action Plan and GHG inventory for all sectors of		
54	the City, to identify the most aggressive local actions its authorities and resources will allow,		
55	along with costs and benefits of these actions; and		
56			
57	BE IT FURTHER RESOLVED THAT the Plan update should identify what steps the City can		
58	take to move rapidly toward net zero greenhouse gas emissions by 2035, including near term		
59	implementation steps and achievable interim goals and dates; and		
60 61	BE IT FURTHER RESOLVED THAT the Plan should:		
61 62	 Focus on dramatically improving efficiency of all our buildings (single family, 		
62 63	multifamily, commercial and institutional), by far the largest sector of local GHG		
65 64	emissions; as well as a transition to renewable energy in electricity and heating/cooling;		
65			
65 66	• Propose actions that integrate with other City Council priority goals, such as housing affordability and racial equity;		
67	 Offer methods that consider equity, affordability, and access for all members of our 		
68	community, especially renters and low income and energy-burdened residents;		
69	 Include a transparent and inclusive public process to gather public input, increase 		
70	community engagement, and ensure that community members and local businesses have		
70 71	opportunities to participate; and		
72	 Examine leading policies around the country and build on them to propose nation-leading 		
73	policies for our community.		
74	poneles for our community.		
75	BE IT FURTHER RESOLVED THAT the City Council seeks results of this Plan and		
76	recommendations from the City Sustainability Manager on specific methods (as well as costs and		
77	savings) for accelerating the City's sustainable energy action program Dec. 31, 2019.		
78			
79	BE IT FURTHER RESOLVED THAT the City of Takoma Park will address local actions for		
80	climate adaptation and resiliency, such as stormwater, trees and green space, and greenhouse gas		
81	capture and sequestration, as our authorities and resources will allow.		
82			
83	Adopted by the Council of the City of Takoma Park this day of, 2019.		
84			
85	Attest:		
86			
87			
88	Jessie Carpenter, CMC		
89 00	City Clerk

COUNTY COUNCIL FOR MONTGOMERY COUNTY, MARYLAND

Lead Sponsors: Councilmembers Elrich, Leventhal and Berliner Co-sponsors: Councilmembers Rice, Katz, Riemer, Navarro and Hucker

SUBJECT: <u>Emergency Climate Mobilization</u>

Background

- 1. Current global warming of approximately 1 degree Celsius has triggered cataclysmic changes to the Earth. These changes include an accelerating collapse of the West Antarctic Ice Sheet, the thawing of the Arctic permafrost, an increase in mega-droughts, heat waves, super-storms, flash flooding, the migration of mosquito-borne diseases, the melting of glaciers, polar ice-sheet collapse, coral bleaching, the mass extinction of species, ocean oxygen loss, and sea level rise.
- 2. Climate change will cause an increase in water and food shortages, civil unrest, state failure, civil war and terrorism throughout the world, with no region or nation being immune to these effects, including Montgomery County.
- 3. There is a strong consensus among scientists that greenhouse gas emissions must be eliminated in a decade at most -- with a simultaneous global effort to remove excess carbon from the atmosphere -- to stabilize at or near the 1.5 C (2.4 F) threshold believed to provide a reasonable chance for the survival of human civilization and other complex life forms on this planet.
- 4. The federal government, national media, and civil society, including most climate organizations, have drastically underestimated the urgency of the climate and ecological crises, failed to accept that we face an unprecedented global emergency, and relied on failed strategies of gradualism.
- 5. We must together implement a massive emergency global mobilization effort to successfully eliminate greenhouse gas emissions and remove excess carbon from the atmosphere.
- 6. Each of us has the moral duty to safeguard the planet for future generations.

7. Montgomery County has been a national leader in responding to the challenge of climate change, including establishing a goal of reducing greenhouse gas emissions in the County by 80% by 2050 compared to 2005 levels, yet now needs to do much more, much faster.

<u>Action</u>

The County Council for Montgomery County, Maryland approves the following resolution:

The Montgomery County Council calls upon the national Administration, the Congress, the State, and other local governments to join Montgomery County, to use all available powers and resources to:

- 1. declare a climate emergency and initiate a massive global mobilization to restore a safe climate and build a sustainable economy; and
- 2. transform the climate by reducing greenhouse gas emissions by 80% by 2027 and reaching 100% elimination by 2035, and initiate large-scale efforts to remove excess carbon from the atmosphere.

The Montgomery County Council calls upon the Montgomery County Executive, Montgomery County Public Schools and Maryland-National Capital Park and Planning Commission to advise the Council over the next six months on specific methods for accelerating the County's greenhouse gas emissions reduction goal.

This is a correct copy of Council action.

Linda M. Lauer, Clerk of the Council
