

Takoma Park City Council Meeting – March 20, 2019 Agenda Item 3

Voting Session

First Reading Ordinance Prohibiting the Commercial Use of Plastic Beverage Straws and Stirrers

Recommended Council Action

Vote on ordinance at first reading.

Context with Key Issues

Plastic beverage straws and stirrers, including so called “compostable” products made of biologically based polymers, contribute to litter in the local environment and contribute to the nonbiodegradable waste accumulating in landfills and oceans. Straws and stirrers made of paper, wood, and other biodegradable materials and reusable products provide environmentally friendly alternatives to disposable plastic products. The proposed Ordinance generally prohibits retail establishments from providing customers with plastic straws and stirrers for use with dine-in and carry out beverages. However, some individuals require flexible plastic straws to allow them to consume beverages because of physical conditions. Therefore, the proposed Ordinance allows for the provision of flexible plastic straws upon request and requires that retail establishments maintain a stock of flexible plastic straws for that purpose.

The Ordinance also prohibits the provision of plastic straws and stirrers at City sponsored events and in City facilities. It encourages other institutions in the City to switch to reusable or biodegradable products.

A minor wording change was made to the proposed language of Chapter 8.52.020 – line D of the Code for clarity.

Council Priority

Environmentally sustainable community.

Environmental Impact of Action

Reduction of waste and litter.

Fiscal Impact of Action

The Neighborhood Services Team enforces the City’s environmental codes and encourages compliance through education.

Racial Equity Considerations

All residents of the City will enjoy the environmental benefits of reducing waste. All businesses that sell beverages will be impacted since they must train their staffs to comply, and purchase non-plastic straw products if their customers expect them. This may have a disproportionate effect on

smaller businesses that have closer cost margins, many of which may be owned by people of color.
