NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM GENERAL PERMIT FOR DISCHARGES FROM SMALL MUNICIPAL SEPARATE STORM SEWER SYSTEMS

GENERAL DISCHARGE PERMIT NO. 13-IM-5500 GENERAL NPDES NO. MDR055500

Final Determination: April 27, 2018
Effective Date: October 31, 2018
Expiration Date: October 30, 2023

This National Pollutant Discharge Elimination System (NPDES) general permit covers small municipal separate storm sewer systems (MS4s) in certain portions of the State of Maryland. MS4 owners and operators to be regulated under this general permit must submit a Notice of Intent (NOI) to MDE by October 31, 2018. An NOI serves as notification that the MS4 owner or operator intends to comply with the terms and conditions of this general permit.

APPENDIX D

Municipal Small MS4 Progress Report

Maryland Department of the Environment (MDE)

National Pollutant Discharge Elimination System (NPDES) Small Municipal Separate Storm Sewer Systems (MS4) General Permit

This Progress Report is required for those jurisdictions covered under General Discharge Permit No. 13-IM-5500. Progress Reports must be submitted to:

Maryland Department of the Environment, Water and Science Administration Sediment, Stormwater, and Dam Safety Program 1800 Washington Boulevard, Suite 440, Baltimore, MD 21230-1708 Phone: 410-537-3543 FAX: 410-537-3553

Compliance with Reporting Requirements

Part VI of the Small MS4 General Discharge Permit (No. 13-IM-5500) specifies the reporting information that must be submitted to MDE to demonstrate compliance with permit conditions. The specific information required in this MS4 Progress Report includes:

- 1. Annual: Progress toward compliance with impervious area restoration requirements in accordance with Part V of the general permit. All requested information and supporting documentation must be submitted as specified in Section I of the Progress Report.
- 2. Years 2 and 4: Progress toward compliance with the six minimum control measures in accordance with Part IV of the general permit. All requested information and supporting documentation shall be reported as specified in Section II of the Progress Report. MDE may request more frequent reporting and/or a final report in year 5 if additional information is needed to demonstrate compliance with the permit.

Instructions for Completing Appendix D Reporting Forms

The reporting forms provided in Appendix D allow the user to electronically fill in answers to questions. Users may enter quantifiable information (e.g., number of outfalls inspected) in text boxes. When a more descriptive explanation is requested, the reporting forms will expand as the user types to allow as much information needed to fully answer the question. The permittee must indicate in the forms when attachments are included to provide sufficient information required in the MS4 Progress Report.

1.	a. Was the impervious area baseline assessment submitted in year 1? ▼Yes □No
	b. If No, describe the status of completing the required information and provide a date at which all information required by MDE will be submitted:
	c. Has the baseline been adjusted since the previous reporting year? ☐ Yes ✓ No
2. 0	Complete the information below based on the most recent data:
	Total impervious acres of jurisdiction covered under this permit: 546.9
	Total impervious acres treated by stormwater water quality best management practices (BMPs): 85.15
	Total impervious acres treated by BMPs providing partial water quality treatment (multiply acres treated by percent of water quality provided): 4.5
	Total impervious acres treated by nonstructural practices (i.e., rooftop disconnections, non-rooftop disconnections, or vegetated swales): 0.1
	Total impervious acres untreated in the jurisdiction: 461.75
	Twenty percent of this total area (this is the restoration requirement): 109.38
	Verify that all impervious area draining to BMPs with missing inspection records is not considered treated. Describe how this information was incorporated into the overall analysis:
All Bi otals.	MPs in the 2023 report have current inspection records and are included in the treatment
2.	Has an Impervious Area Restoration Work Plan been developed and submitted to MDE in accordance with Part V.B, Table 1 of the permit or other format? ▼Yes □No
	Has MDE approved the work plan? ▼Yes □No

If the answer to either question is No, describe the status of submitting (or resubmitting) the work plan to MDE and provide a date at which all outstanding information will be available:

Describe progress made toward restoration planning, design, and construction efforts and describe adaptive management strategies necessary to meet restoration requirements by the end of the permit term:

Alternative BMPs such as Outfall stabilization, stream restoration, continue to be implemented as our main implementation strategy. While updating and revising the Restoration Activity Schedule We have refined the planned activities in the direction of meeting the program objectives.

The City continued planning and implementation of the Best Management Practices and treatment facilities from, November 2022 through October 2023.

The portion of stream restoration at Takoma Branch, that was planned over multiple years, was implemented in September 2023. Construction of two (2) bioretention facility on Larch Ave and Hopewell Avenue was completed in July. Additionally, the City continued an enhanced tree planting program (Tree Takoma) which is providing trees at no cost to City residents, focusing on areas with less canopy, multi-family, and commercial properties. City collaborated with MNCPPC by providing partial funding, design development and construction of two (2) bioretention facilities at Hill wood Manor Playground. Additionally, the City started operation of a new EV street sweeper, trying to enhance and expand the street sweeping operations and efforts Stabilization of severely eroded outfall slopes at Jefferson Avenue and restoration of a failed outfall at Brashear's Run are anticipated by the end of this fiscal year. City is Planning for Installation of four (4) Filteras and one (1) Bio-scape at Houston Court and Houston Avenue. Also anticipated is Installation of four (4) Filteras at Albany and Baltimore Avenue Intersection.

In the upcoming year, the City intends to complete several outfall stabilization projects and plan an intermittent stream restorations within the City. The City will also plan to design and implement Phase two of Brashear's' Run and Takoma Branch Stream restoration Projects.

Has a Restoration Schedule been completed and submitted to MDE in accordance with Part V.B, Table 2 of the permit? ▼Yes □No
In year 5, has a complete restoration schedule been submitted including a complete list of projects and implementation dates for all BMPs needed to meet the twenty percent restoration requirement? ☐ Yes ► No
Are the projected implementation years for completion of all BMPs no later than 2025? $\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \$
Describe actions planned to provide a complete list of projects in order to achieve compliance by the end of the permit term:
Our program plans include outfall stabilization and stream restoration in the upcoming years. We also plan to expand our street sweeping program frequency to increase the amount of credit, as well as increase tree planting.
Describe the progress of restoration efforts (attach examples and photos of proposed or completed projects when available):
The restoration projects completed in 2023 included the installation of a 1520 SF surface area bioretention pond at Hopewell and at Larch Avenues. These faculties were completed in 1012 2022
in July 2023. The stream restoration at Takoma Branch was implemented in September 2023. Two (2) Micro Bio Retention Ponds were constructed at Hillwood Manor Neighborhood Park
Has the BMP database been submitted to MDE in Microsoft Excel format in accordance with Appendix B, Tables B.1.a, b, and c? ▼Yes □No
Is the database complete? ▼Yes No
If either answer is No, describe efforts underway to complete all data fields, and a date that MDE will receive the required information:

5. Provide a summary of impervious area restoration activities planned for the next reporting cycle (attach additional information if necessary):

Restoration activities planned for the next reporting period will include:

- Outfall structure Number 243 (Poplar Avenue)
- Bioretention @ Gude & Poplar Ave.
- Sligo Mill Rd Outfall Restoration
- Inlet Pipes and Filteras @ Kennebec from Roanoke Avenue to Houston Avenue
- Outfall structure number 1028(7113 Central Avenue)
- Outfall structure number 1221(7101 New Hampshire Ave)

The design and MDE permit for the Takoma Branch Stream Restoration Project Phase 2 consisting of Approximately 500 linear feet of outfall and stream bank restoration is planned to be pursued. The Phase 1 of Takoma Branch stream bank and outfall stabilization was completed in September of 2023.

6. Describe coordination efforts with other agencies regarding the implementation of impervious area restoration activities:

Most outfall stabilization projects within the City is under MNPPC The Takoma Branch Stream restoration is a joint effort which was completed this summer the land is owned by MNCPPC. The project design was a collaborative effort between the City and MNCPPC. The City is funding this phase of construction.

Jefferson Avenue Outfall Stabilization Project scheduled for this fiscal year is another permitted collaborative with MNCPPC.

Similarly, the Brashear's Run outfall stabilization was collaboratively designed by the City and MNCPPC, but financed by the City.

Also finalized and placed on this period was Hillwood Manor Neighborhood Park Two (2) bio retention s credited to the City.

7. List total cost of developing and implementing the impervious area restoration program during the permit term:

Installation of BMP's since 2007 to date incurred an estimated total cost of \$\$5,930,229.44 for both structural and alternative measures.

The annual budget is typically \$700 - \$750K and includes \$250,000 for Capital Projects, \$180,000 for maintenance and repairs, \$150,000 for video inspections, pipe cleaning, and IDDE, and \$150,000 for engineering assistance. The remainder is personnel costs for the 0.75 FTE's associated with the program.

The FY24 Stormwater management budget is \$781,781

City of Takoma Park RESPONSE TO REVIEW COMMENTS

Small Municipal Separate Storm Sewer System (MS4) Permit Maryland Department of the Environment (Department) Review of Fiscal Year (FY) 2022 MS4 General Permit Progress Report

The City's response to review comments are noted below each item

REPORTING

- 1. The City of Takoma Park ("Takoma Park" or "The City") submitted a complete Progress Report Form and included a signature for the appropriate responsible personnel and contact information. This information is required to be updated annually.
- 2. The next Progress Report is due on October 31, 2023 and must include updates to the impervious area restoration program and responses to comments outlined below.

Items 1,2 – comments noted

SECTION I: IMPERVIOUS AREA RESTORATION REPORTING

3. The City of Takoma Park calculated an impervious area restoration target of 110 acres based on a total untreated impervious area baseline of 467 acres. The City identified potential projects that will restore 101 acres by 2025 including 46 acres of completed projects.

comment noted

4. In the next Progress Report the City must demonstrate a plan to meet the restoration target by 2025, including the remaining 9 acres, to meet the permit. The City estimated the target will be met by 2027, with a further 24 additional acres planned by 2032. The City indicated that in September 2020, resources were diverted to deal with a significant flash flooding event and as a result, the City will be unable to complete 20% restoration by 2025. While the Department recognizes unforeseen circumstances can occur that require immediate attention, the permit requires the City to plan to restore 20% of its impervious area by 2025. The City indicated in its Work Plan that it will submit a list of remaining projects to meet the 20% restoration target in the next Progress Report. To meet the permit requirement, the City must submit a plan and an updated RAS in the next Progress Report demonstrating how it plans to meet the restoration target by 2025.

As discussed during our virtual meeting of March 16, 2022 due to the factors reported in 2021 report the city will not be able to meet the 20% restoration target by 2025. The factors discussed included:

- Delayed Water Quality Treatment projects due to the pandemic impacts to our staffing and contractor
- Revision of the alternative treatment credit computations.
- The need to redirect staff efforts and City's resources to address flooding problems in 2020

As a result, based on our projected work schedule, the City will fall short of the required 20% treatment goal by 2025. The City will submit an updated RAS with this Progress Report. The City will develop a plan with projects identified that will meet the required target by 2030. This new target will consist of 10% of the impervious area base line or 54.7 acres plus the difference of 2025 permit target and IA treatment provided during this period. IF APPROVED THE NEW TARGET WILL BE SET AT 61.2 acres

City of Takoma Park FY 2022 Progress Report Review Response Page | 2

5. The Work Plan was submitted in the required format and described restoration activities over the five-year permit term. In the fifth year, the City planned to submit a list of remaining projects to meet the 20% restoration target, hire a contractor to conduct a Stormwater Resiliency Study, expand its street sweeping and tree planting programs, and implement outfall stabilization and stream restoration projects.

comment noted

A revised RAS is submitted with this report. The City contracted with LIDC for a Stormwater Resiliency Study which will be completed in Fall of 2023.

Street sweeping with newly acquired EV sweeper is in progress.

City will continue to develop and schedule Outfall Stabilization and Stream restorations projects.

- 6. A Restoration Activity Schedule (RAS) was submitted in the required format.
- **a.** The City listed 4 outfall stabilization that it has taken credit for that are located on Maryland National-Capital Parks and Planning Commission (MNCPPC) property, the projects were approved by MNCPPC and funded by the City. The City planned to develop a Memorandum of Understanding (MOU) this year between the City and MNCPPC. Submit a copy of the MOU in the next Progress Report.

The City and MNCPPC will continue to collaborate on projects that are on MNCPPC's property on the basis of the permit obtained. An MOU was not obtained.

b. Please continue to plan for restoration implementation beyond 2025. An updated RAS submitted in the 2023 Progress Report should provide an estimate of impervious area restoration implementation through 2030. The Department recommends that the City should plan for additional restoration equivalent to 10% by 2030. This information will help to inform future permit requirements.

The City developed an updated restoration plan for the 2023 Progress Report that include an estimate of impervious area to be restored. The City will comply with recommendation of the Department regarding additional 2030 target restoration equivalent to 10% of the current baseline plus the shortfall credit for this permit. The 10% of the current baseline target is equal to 54.7 acres. The deficiency from 2025 permit is 6.5 acres of Impervious area restoration. The target impervious area restoration through 2030 is, therefore, set at 61.2 acres. As the actual implementations occurs, target restorations will be revised.

- 7. The BMP database was submitted in the proper format. Please correct the following:
- a. All 136 BMPs had a current triennial inspection date, and all had a Passing status. The City is congratulated for this significant effort.

comment noted

b. The City reported for Minimum Control Measure 5 that there were 174 BMPs in the jurisdiction and the database were complete and up to date. However, only 136 were listed in Table B.1.a of the BMP database. Please clarify the total number of BMPs. Ensure all BMPs are entered in the database and provide a status update in the next Progress Report.

No. Of	42
Permits	Permits
Permitted	82
	BMPs
Public	95
	BMPS
Alternative	22

City of Takoma Park FY 2022 Progress Report Review Response Page | 3

Currently 42 permitted facilities that are listed reflect 82 permitted BMPS. There are also 95 Public BMPs as well as 22 Alternative BMPs.

In the 2023 report all BMPs completed will be entered in the database and status will be update The projects will be included after completion. Table B.1.a of the BMP database will be revised to reflect all BMPs associated with permitted facilities clearly.

MCM #1: Personnel Education and Outreach

- 8. The City provided sufficient information to demonstrate compliance with this MCM. *comment noted*.
- 9. The City distributed outreach to the public through various channels including by mail, newsletter, website, and during stakeholder meetings.

comment noted.

10. The City shall continue to implement this program and provide an update in future Progress Reports as requested by the Department.

comment noted

MCM #2: Public Involvement and Participation

- 11. The City provided sufficient information to demonstrate compliance with this MCM. *comment noted*.
- 12. The City engaged 125 participants including 8 staff in public activities to plant 221 trees and clean approximately 2,640 feet of stream.

comment noted.

MCM #3: Illicit Discharge Detection and Elimination (IDDE)

14. Further information listed below must be submitted in the next Progress Report to demonstrate compliance with permit requirements.

comment noted.

15. The City must establish a local code or ordinance that prohibits illicit connections and non-stormwater discharges to the MS4 and that authorizes the City to inspect and enforce to ensure compliance.

Noted. The City has started the process for adoption of an ordinance that prohibits illicit connections and non-stormwater discharges to the MS4 and that authorizes the City to inspect and enforce to ensure compliance. The City will submit a draft ordinance to MDE prior to adoption. The council has included adoption of the ID Ordinance for September Schedule

16. The City screened all 78 outfalls, observed 37 dry weather flows, and determined 36 were illicit discharges. A summary of results was provided.

comment noted.

17. The City shall continue to implement this program and provide an update in future Progress Reports as requested by the Department.

comment noted.

City of Takoma Park FY 2022 Progress Report Review Response Page | 4

MCM #4: Construction Site Stormwater Runoff Control

- 18. The City provided sufficient information to demonstrate compliance with this MCM. *comment noted.*
- 19. The City responded to three complaints by visiting the respective sites and coordinating with Montgomery County to resolve the issues. A summary was provided.

comment noted

20. The City shall continue to implement this program and provide an update in future Progress Reports as requested by the Department.

comment noted

MCM #5: Post Construction Stormwater Management

- 21. The City provided sufficient information to demonstrate compliance with this MCM. *comment noted*
- 22. The City reported 33 triennial inspections were done on 174 existing BMPs; no violations were issued.

comment noted

23. The City described maintenance of public bioretention BMPs is done multiple times per year and as needed for Filterras and stream restorations but at least every three years. The City inspects and maintains any private BMPs where there is no response from the owner or maintenance is inadequate. In-house inspection and maintenance efforts are supplemented with support from contractors for specialized inspections. This process meets the requirements of the permit.

comment noted

24. The City shall continue to implement this program and provide an update in future Progress Reports as requested by the Department.

comment noted

MCM #6: Pollution Prevention and Good Housekeeping

- 25. The City provided sufficient information to demonstrate compliance with this MCM. *comment noted*
- 26. The City described property management activities including inlet cleaning and training. *comment noted*
- 27. The City shall continue to implement this program and provide an update in future Progress Reports as requested by the Department.

comment noted

FINANCIAL INFORMATION

28. The City reported the total cost at this time includes \$4.6M for restoration activities and \$1.4M to implement the Minimum Control Measures. The Department commends the City for its commitment to maintaining program funding. Please continue to report cost information in future Progress Reports as requested by the
