

City of Takoma Park

## Washington Adventist Hospital

Adventist HealthCare White Oak Medical Center has been working closely with the State of Maryland to coordinate surge capacity to care for COVID-19 patients. This plan includes expanding capacity at both the hospital in White Oak and at the Takoma Park campus of the former Washington Adventist Hospital.

The State of Maryland has approved the following interim plan for the Takoma Park facility: **63 beds** will be converted to accept **non-COVID-19 medical/surgical patients who are stable**.

These **services in Takoma Park** are **expected** to be available on or **around Monday, April 13**; thus, you may see additional ambulatory traffic in and around Takoma Park.

We continue to evaluate ways to utilize additional surge capacity beyond the 63 beds in conjunction with county and state planners.

### Please note:

- All **medical/surgical patients** will be **transferred to Takoma Park from White Oak**.
- All inpatients for the Takoma Park campus will be registered at, and transferred from, White Oak Medical Center.
- The Takoma Park campus **will not have an emergency department** and it **will not accept patients** directly.
- The **urgent care center** on the Takoma Park campus **will continue with the same services** as it had before.

**All community members who have a medical emergency should dial 911.**
